Bug ID: BUG-003

Title: Password strength indicator does not display any level for a fully valid strong password.

Environment :

Application: Practice Software Testing (Toolshop Demo)
URL: https://practicesoftwaretesting.com
Page: Sign Up page
Browser: Opera browser

Preconditions: User is on the Customer Registration (Sign Up) page.

Steps to Reproduce:

1. Open the Sign Up page.
2. Click into the password field.
3. Enter a password that satisfies all 4 rules and is reasonably long (e.g. "Test1234!Strong").
4. Observe the "Password strength" indicator below the field.

Expected Result: The strength indicator should move to "Strong", "Very Strong", or "Excellent", reflecting that all rules are met.

Actual Result: The account was created successfully and the user was redirected to the Login page. However, the password strength indicator did not display any level (remained blank) even though the password satisfied all 4 rules, contradicting the expected "Strong/Very Strong/Excellent" behavior.

Severity: Minor

Priority: Low
