Bug ID: BUG-004

Title: Auto-filled City and State fields do not match the entered postal code during sign up.

Environment :

Application: Practice Software Testing (Toolshop Demo)
URL: https://practicesoftwaretesting.com
Page: Sign Up page
Browser: Opera browser

Preconditions: User is on the Customer Registration (Sign Up) page.

Steps to Reproduce:

1. Open the Sign Up page.
2. Select a country from the "Ülkeniz" dropdown.
3. Enter a valid postal code in the "Posta Kodunuz" field.
4. Enter a house number in the "Kapı numaranız" field.
5. Observe the Street, City and State fields.

Expected Result: The Street, City, and State fields should be automatically filled in based on the entered country and postal code.

Actual Result: The Street field auto-filled correctly. However, the City field auto-filled with an incorrect value ("Elazığ") that does not match postal code 35000 (which belongs to İzmir), and the State field did not auto-fill at all — it remained empty and had to be entered manually.

Severity: Major

Priority: Medium
