**Bug ID:** BUG-010

**Title:** An image resource is preloaded with link rel="preload" but never used, logging a console warning on the checkout page.

**Environment :**

Application: Practice Software Testing (Toolshop Demo)

URL: https://practicesoftwaretesting.com/checkout

Page: Checkout page

Browser: Chrome

**Preconditions:** User is on the checkout page with at least one product in the cart.

**Steps to Reproduce:**

1. Log in and add at least one product to the cart.
2. Open Chrome DevTools, go to the Console tab, clear it.
3. Open the cart / checkout page.
4. Let the page finish loading and wait a few seconds.
5. Observe the console for resource-preload warnings.

**Expected Result:** A resource that is marked with link rel="preload" should actually be used shortly after the page load event; otherwise it should not be preloaded, or its "as" attribute should be set correctly. No console warnings should be produced for unused preloaded resources.

**Actual Result:** The console repeatedly displayed the warning: "The resource https://practicesoftwaretesting.com/assets/img/barn-2400x1600.avif was preloaded using link preload but not used within a few seconds from the window's load event. Please make sure it has an appropriate 'as' value and it is preloaded intentionally." This warning appeared 3 times on the checkout page and does not affect functionality, but indicates an unnecessary resource preload that wastes bandwidth.

**Severity:** Trivial (Performance / Resource Hint Issue)

**Priority:** Low

**Evidence:**

Evidence/Screenshots/DT-003_cart_qty3_console.png

**Related Test Case:** DT-003

# Jira Tracking

This bug is tracked in Jira:

https://nuronel.atlassian.net/browse/KAN-11
